

# Welcome to the Certificate in Climate Studies and Action

September 2022, first certificate cohort welcome  
and information session

THE UNIVERSITY OF BRITISH COLUMBIA  
Certificate in Climate Studies and Action

# Land Acknowledgement

We would like to begin by acknowledging that the land on which we gather is the traditional, ancestral, and unceded territory of the xwməθkwəyəm (Musqueam) People.

- 
- To be a climate change option open to **ALL** undergraduate students at UBC
  - To meet the student demand for climate action oriented curriculum
  - To train climate action advocates, providing them with skills and a wide range of disciplinary approaches to understanding the problem and the “solutions”

## What are the program objectives?

---

- Like a mini-minor (12-18 credits) but without the restrictions on credit overlap. **All of the credits in the certificate can also count towards your primary degree program.**

## What is a certificate?

# Program Learning Objectives

## 1 Apply Climate Literacy

---

- Interpret climate change and its disproportionate impacts through an interdisciplinary, intersectional lens that combines climate science and the socio-political, economic, cultural and historical drivers, including racialization, colonialism and capitalism.
- Delineate the scale and scope of decarbonization and energy transitions aligned with a 1.5°C future.

## 3 Develop a Practice For Climate Action

---

- Acquire an interdisciplinary practice that supports work in climate action including:
  - systems and interdisciplinary thinking
  - value mapping
  - engaging diverse knowledge systems (including Indigenous)
  - relationship building
  - reciprocal research practice
  - climate communications

## 2 Critically Assess Climate Strategies

---

- Assess the efficacy and equity of various efforts, policies and strategies that have been developed to address climate change
- Engage concepts like climate justice and just transitions and debate their meaning, importance and application to climate change and decarbonization.

## 4 Contribute to Climate Action, Discourse and Activities

---

- Engage with the climate change community within UBC and beyond
- Make critical and hopeful contributions to dialogue on climate change in public space
- Design and implement interdisciplinary, community-engaged climate action projects.

# Certificate Structure

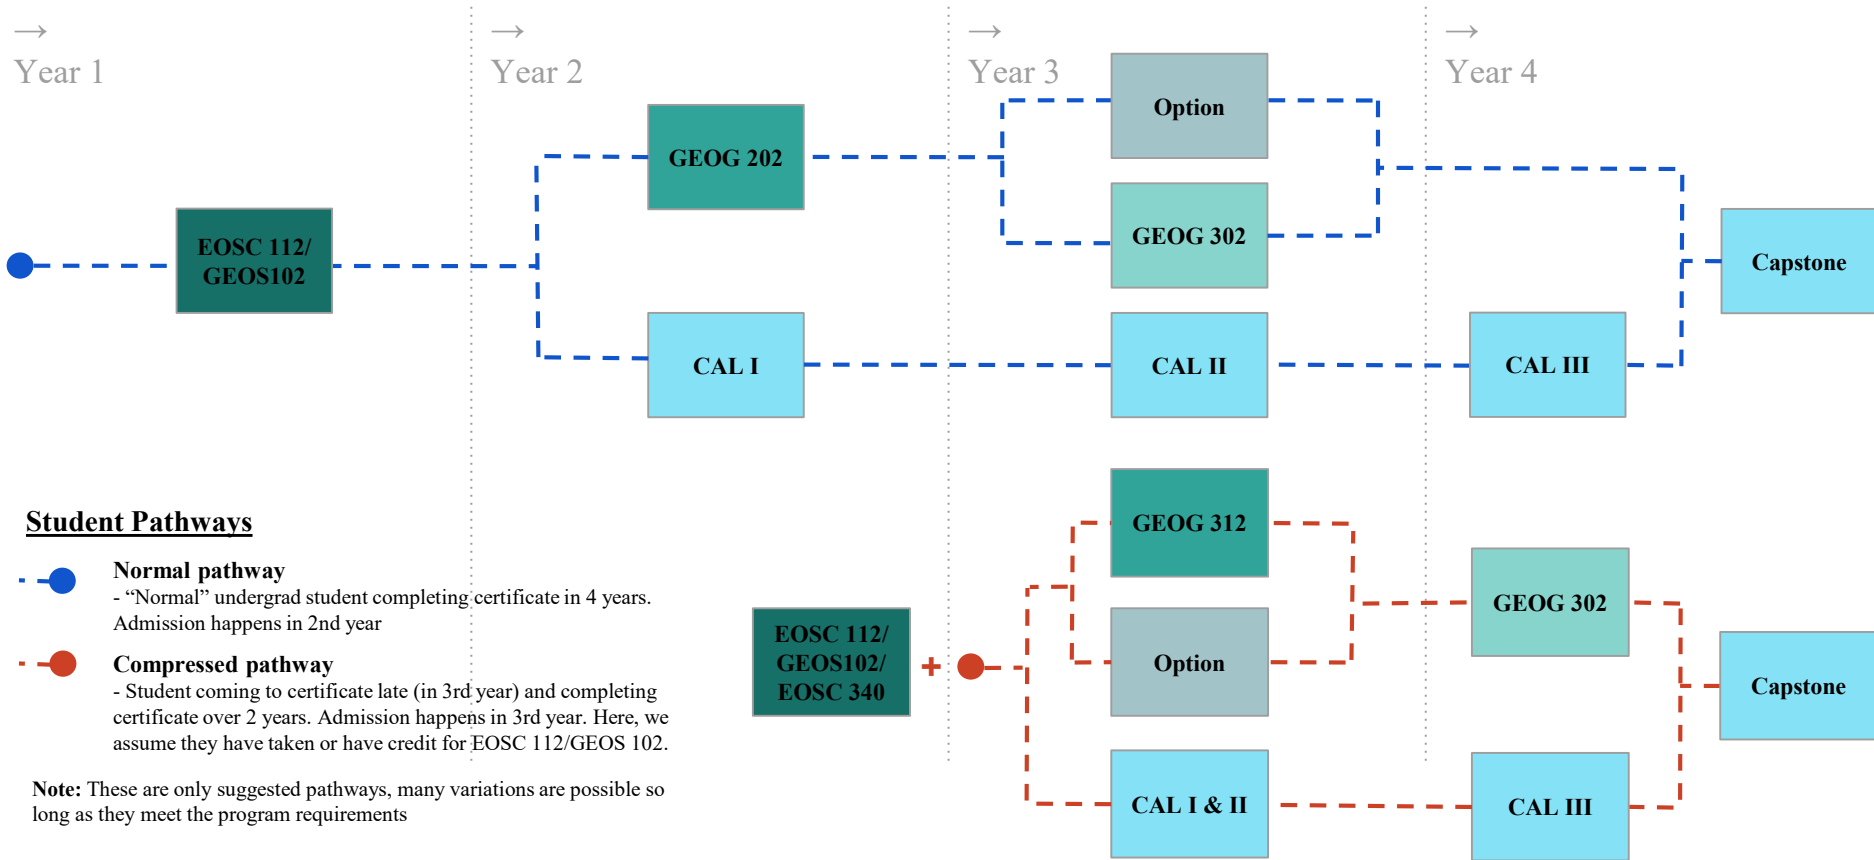

18 credits total, 5 required course sets, 8 individual courses

Climate Science (3 credits)	Climate Emergency (3 credits)	Climate Justice (3 credits)	Options (3 credits)	Climate Action (6 credits)
One of: GEOS 102, EOSC 112, EOSC 340	One of: <b>GEOG 202</b> , GEOG 312, CONS 210	<b>GEOG 302</b>	One of: EOSC 340, ENVR 410, GEOG 312, POLI 351, CONS 425, NURS 290, CONS 310, GEOS 408	<b>Climate Action Labs (ENVR 201, 301, 302, 401)</b> and <b>Capstone (ENVR/GEOG 402)</b>

## Notes:

- **New courses are in red**
- GEOS is the new GEOB
- 300-level options are included for Climate Science (EOSC 340) and Climate Emergency (GEOG 312) to accommodate upper level students that need to meet upper-level credit degree requirements
- Credits can only be applied to one category (i.e. EOSC 340 and GEOG 312 can only be used in one course set)
- The CONS 210 option in the Climate Emergency course set is only available to Forestry students
- ENVR 201, ENVR 301 and ENVR 401 are intended to be taken as three 1-credit courses over three years. ENVR 302 combines 201 and 301 into a 2-credit option. With approval from the certificate Director, students needing to compress the certificate into two years can take ENVR 302.
- The ENVR and GEOG version of the capstone are equivalents. Students can take whichever course best fits their requirements

# Visual Summary

## Student Pathways

- ● **Normal pathway**  
- "Normal" undergrad student completing certificate in 4 years. Admission happens in 2nd year
- ● **Compressed pathway**  
- Student coming to certificate late (in 3rd year) and completing certificate over 2 years. Admission happens in 3rd year. Here, we assume they have taken or have credit for EOOSC 112/GEOS 102.

**Note:** These are only suggested pathways, many variations are possible so long as they meet the program requirements

# Info + who to contact + how to apply

---

Certificate website: <https://geog.ubc.ca/undergraduate/climate-certificate/>

If you have advising or application questions, reach out to the Certificate Administrator (Suzanne Lawrence): [climate.certificate@ubc.ca](mailto:climate.certificate@ubc.ca)

**Admittance to the Certificate is on a first-come-first-served basis for this year until space runs out. There are 11 spots left in this years cohort. Apply via the Certificate website!**

# Questions?
